

Scenario A: "Current Trends"

Based on the current trends for growth over the past 10 years, with limited infill and redevelopment, without agricultural or environmental constraints.

- * Allows for "spill out" from plan boundaries for development in most "attractive" areas
- * Allows for infill but not redevelopment
- * Does not discourage growth on prime ag lands
- * Does not discourage growth on environmentally sensitive areas.

- Existing Development
- Future Growth by 2050
- Public Land/Open Space & Water
- Important Farmlands
- Grazing Lands

This scenario uses current and proposed General Plans and Specific Plans were available as a basis for determining growth. Growth is prohibited on State and Federally protected lands.
